

Welcome to TSSI TD-ScanPro!

## Quick Start Guide

- Unzip the software package (e.g., TSSI-TDScanPro2018-r4081.zip)
- Rename the license file oe@tessi.com sent you to "license.lic"
- Copy license.lic into the "licenses" directory
- Follow the instructions below

### I. For New Users or Refreshers:

- Open Windows Explorer and navigate into the installation folder (TSSI-TDScanPro2018-r4081)
- There are three directories: "examples", "licenses" and "tds".
- Launch the WaveMaker GUI by double-clicking on the "run\_wavemaker.bat" icon in the "tds" folder
- In the WaveMaker GUI File Browser, navigate to the "examples\intro" folder to run a couple of small examples

#### Example 1: A WGL to NI-STS Conversion.

- Double click on the wgl-to-nists.scn Scenario to display a flow
- Inside the Scenario flow diagram, select Run->Scenario
- NI-STS tester output files will be generated into the "nists-wgl.out" (all file names are modifiable by users)
- These NI-STS output files are ready to be compiled by the NI Digital Pattern Editor supplied by NI
- Feel free to move, double click, and examine all components

#### Example 2: A STIL to NI-STS Conversion.

- Double click on the stil-to-nists.scn Scenario to display a flow
- Inside the Scenario flow diagram, select Run->Scenario
- NI-STS tester output files will be generated into the "nists-stil.out" (all file names are modifiable by users)
- These NI-STS output files are ready to be compiled by the NI Digital Pattern Editor supplied by NI
- Feel free to move, double click, and examine all components

Double click on the "j750 testerbridge" icon will reveal its Properties tab for controlling various options of the TesterBridge operations

### II. For Advanced Users or Users in Training:

- Double click on "run\_wavemaker.bat" to launch our GUI: WaveMaker+
- Double click on the "OrbitDemo" folder to run examples of batch processing of multiple WGL and EVCD files

Please follow instructions provided, or contact "hotline@tessi.com".

### III. User manuals are available with the software.

- For the WaveMaker+ GUI operations, select Help->WaveMaker+ Manual...
- For all other aspects of the software system, select Help->Solstice Manual...

### IV. Troubleshooting

- If WaveMaker+ GUI failed to launch due to "Unable to Checkout License", double check in run\_wavemaker.bat script that RLM\_LICENSE is pointing to the path where your license file is stored.

Feel free to explore. Contact "hotline@tessi.com" for any questions.
